-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 101*

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 7-12 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Claims 7-12 appear drawn to computer software which is non-statutory subject matter. The claims recite “modules” and in light of the specification (see p. 8) wherein the agent and modules are “software” modules. The claims do not recite a proper computer readable storage medium or the corresponding computer structure to execute and realize the computer software.

### *Claim Rejections - 35 USC § 102*

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1 and 7, as best understood, are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 7,076,042 to Praturi et al.

As concerns claims 1 and 7, a method/apparatus for performing common call processing management using a common software platform including horizontal components for providing common functions required in all communication systems, and vertical components for

Art Unit: 2151

providing specific functions on the basis of communication systems, comprising the steps of: allowing a common agent (column 21, line 61-420 basic control module) to perform corresponding operations including an operation of gathering Internet information (column 12, line 22) on the basis of a predetermined schedule irrespective of a manager's intervention; allowing an operations administration and maintenance module to administer and maintain a network in which the corresponding operations are performed on the Internet (column 13, lines 3-5 – OAM 218); and allowing a common call processor (column 2, lines 30-42) to manage a subscriber in response to a call signal provided from a physical component receiving a subscriber signal and set up a voice path (column 21, lines 38-40) on the basis of the call signal where the subscriber signal can be transmitted through the voice path.

#### ***Allowable Subject Matter***

5. Claims 2-6 and 8-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and as concerns claims 8-12, rewritten to overcome the USC 101 rejection above.

#### ***Conclusion***

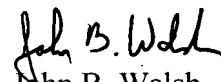

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
